Issued/Filed Dates: **Nov. 30, 1999 / May 14, 1998**

Application Number: **JP1998000131915**

IPC Class: **G06F 17//30; G06F 13//00;**

Abstract: **Problem to be solved:** To enable a user to flexibly change and expand a method of retrieving in a WWW.

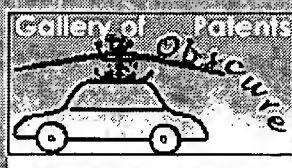

Solution: A WWW browser 10 holds an SQL sentence and a retrieving condition and transfers the information to a sentence construction analyzing function 203. The function 203 analyzes the retrieving condition and the SQL sentence received from the browser 10 to compose a dynamic SQL sentence. A retrieving function 201 issues the SQL sentence prepared by the function 203 to a data base server 30 and receives the result. A result preparing function 202 works a retrieving result received by the function 201 in a form of which the browser 10 can display and returns it to the browser 10.
